Abstracts

Latex-free disposable nitrile gloves are medical-grade disposable gloves made of synthetic nitrile rubber, designed to avoid the risk of natural latex allergies. This type of glove has excellent puncture resistance, chemical protection and elasticity, and is widely used in medical examinations, laboratory operations, food processing and other fields. Compared with traditional latex gloves, nitrile gloves do not contain natural latex protein and are more suitable for users who are sensitive to latex. At the same time, they are more stable when exposed to oily substances and chemical solvents. They are one of the common latex substitutes on the current market.

The global Latex Free Disposable Nitrile Gloves market size was estimated at USD 4701.66 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 2.80% during the forecast period.
