A lawn sweeper, also known as a leaf sweeper, is a garden tool for the mechanical removal of debris, such as fallen leaves, pine needles, twigs, grass clippings or litter, from a lawn or paved area. Lawn sweepers operate via a rotating brush mechanism that sweeps up the debris and deposits it in a collection hopper for disposal. With the improvement of environmental awareness and policy promotion, the demand for electric sweepers is gradually increasing. Electric sweepers have the advantages of zero emissions, low energy consumption, and low noise, and are in line with the development trend of environmental protection.
