Abstracts

Location-based Services (LBS) use real-time geo-data from a mobile device or smartphone to provide information, entertainment or security. Some Services allow consumers to "check in" at restaurants, coffee shops, stores, concerts, and other places or events. Often, businesses offer a reward — prizes, coupons or discounts — to people who check in. Google Maps, Foursquare, GetGlue, Yelp and Facebook Places are among the more popular Services.Location-based Services use a smartphone"s GPS technology to track a person"s location, if that person has opted-in to allow the service to do that. After a smartphone user opts-in, the service can identify his or her location down to a street address without the need for manual data entry.

The global LBS market size was estimated at USD 34060.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 21.70% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global LBS market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global LBS
