Report Overview

LDAR (Leak Detection and Repair) regulations were implemented by the United States Environmental Protection Agency (USEPA) over 35 years ago to control “fugitive emissions” (uncontrolled emissions) from regulated sources in order to protect human health and the environment from harmful pollutants released by industry and mobile sources. An LDAR program is the system of procedures a facility utilizes to locate and repair leaking components, including valves, pumps, connectors, compressors, and agitators, in order to minimize the emission of fugitive volatile organic compounds (VOCs) and hazardous air pollutants (HAPs).
