Abstracts

Leak sealer is designed to address and repair leaks in liquids or gases. Its primary function is to halt leaks in structures, including water and gas pipes, roofs, and building walls. Beyond merely sealing leaks, it reinforces the affected area, offering weather resistance and long-term durability. Leak sealer serves as both an immediate fix and a component of preventative maintenance strategies. Available types include silicone and polyurethane sealers, each suitable for application on surfaces or for injection into crevices. Water leak sealers are notably resistant to water and wear, whereas gas leak sealers excel in air-tightness.

The global Leak Sealer market size was estimated at USD 32190.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
