The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Leakage Current Detection Interrupter?LCDI? competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of Leakage Current Detection Interrupter?LCDI? was approximately 3.2 million units, with an average selling price of about US\$36 per unit. Single-line capacity was approximately 170,000 units per year, with an average gross profit margin of about 25%. LCDI is a safety device used to detect leakage current in power lines and quickly disconnect the circuit. It is mainly used in household appliances such as air conditioners to prevent electric shock and fire risks. This device monitors the current in real time and cuts off the power supply in a very short time when the leakage current exceeds a preset threshold. Its design complies with the US standard UL1699. Upstream raw materials mainly include semiconductor chips, precision transformers, resistors, capacitors, engineering plastics, metal pins, and cables. Downstream applications are highly concentrated in areas with strict electrical safety requirements, mainly including residential and commercial air conditioners, large household appliances (such as dehumidifiers and air purifiers), and the market for RCD power cords as independent accessories, serving equipment replacement and safety upgrade needs.

The global Leakage Current Detection Interrupter?LCDI? market size was estimated at USD 89.6 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
