## Abstracts

Leaky cable, also known as radiating cable or leaky feeder, is a type of communication cable designed to transmit radio frequency (RF) signals while also radiating or "leaking" a portion of those signals along its length. This controlled leakage allows the cable to function as both a transmission medium and an antenna, enabling wireless communication in environments where traditional RF communication methods may be challenging.

**Public Safety and Emergency Communication:** The demand for leaky cable systems in public safety and emergency communication applications continued to grow. These systems are essential for providing reliable wireless communication in critical situations, such as tunnels, subways, and underground facilities.

**Industrial and Mining Applications:** Leaky cable technology found use in industrial settings, including manufacturing facilities, warehouses, and mining operations, where wireless communication is necessary but challenging due to complex environments or safety requirements.

**Infrastructure Development:** Ongoing infrastructure projects, including the construction of new tunnels, subways, and transportation networks, created opportunities for the deployment of leaky cable systems to ensure wireless coverage and communication within these structures.

**Wireless Connectivity in Confined Spaces:** Leaky cable technology is increasingly utilized to provide wireless connectivity in large buildings, such as airports, shopping malls, stadiums, and convention centers, where traditional wireless networks can face challenges with signal propagation.

**Tunneling and Underground Construction:** Leaky cable technology is essential in tunneling and underground construction projects, which are becoming more common in urban areas. The need for reliable wireless communication in these environments drove demand.

The global Leaky Cable market size was estimated at USD 682.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.90% during the forecast period.
