Abstracts

Leather special release paper is a high-performance paper used in the production of leather or synthetic leather materials. It is specially coated with a release agent to prevent the leather from sticking to molds or surfaces during manufacturing processes such as casting, embossing, or curing. This ensures smooth, flawless separation of the leather from molds or layers without damaging its surface. Special release papers are designed to withstand the heat and pressure of leather production, offering optimal performance in industries like fashion, upholstery, automotive, and footwear. They help improve efficiency, reduce defects, and maintain the quality of the final leather product.
