Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Lecturer Tracking PTZ Camera competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A lecturer tracking PTZ (pan-tilt-zoom) camera is a specialized video camera designed to automatically follow and focus on a lecturer or presenter in real-time, enabling seamless capture of their movements during teaching, presentations, or live events. Equipped with advanced motion detection and tracking technology, the camera can pan (rotate horizontally), tilt (move vertically), and zoom in/out to keep the lecturer centered in the frame as they move around a classroom, stage, or conference room. This eliminates the need for manual operation, ensuring consistent and professional video quality for applications such as classroom recording, online live streaming, hybrid meetings, and educational content production.
