Abstracts

LED Illuminated Grille is an important part of the car, and the technology involved is also very high-end and advanced. As the electrification of automobiles develops faster and faster, the air intake function of traditional grilles begins to weaken. In some new car companies, the grilles gradually disappear or become smaller. Some car companies also add interactive elements to the grille design. Digital elements with mainly decorative functions, Automotive Illuminated Grilles emerged at the historic moment. LED Illuminated Grilles can personalize the front face of the car and increase the recognition of the car brand. Especially at night, the luminous grille can play a lighting role, making the front face more technological and making the entire vehicle look cooler.
