## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Neon Strip competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Neon Strip production reached approximately 82,640,000 Km, with an average global market price of around US\$ 10 per meter. Neon Strip is a flexible linear lighting product designed to replicate the visual effect of traditional neon lights using modern light-emitting diode (LED) technology or gas-discharge tubes. It typically features a continuous luminous surface, housed in a durable silicone or PVC casing that provides uniform brightness, weather resistance, and high flexibility.
