## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on LED Smart Light Pole competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. With the advancement of smart cities, lamp pole screens are becoming more and more popular. Smart lamp pole screens have the characteristics of electronicization, networking, and wide distribution, and have become an important facility for the construction of smart cities. The development trend of LED smart light poles shows the characteristics of multi-functional integration, intelligence and green energy saving. With the advancement of smart city construction, LED smart light poles are not only limited to lighting functions, but also integrate multiple functions such as environmental monitoring, video surveillance, 5G base stations, public Wi-Fi and charging piles, becoming an important part of urban infrastructure. In the future, with the application of Internet of Things technology, smart light poles will pay more attention to data sharing and the construction of urban comprehensive service platforms, and promote the efficient operation of intelligent transportation, urban management and energy monitoring. In addition, the combination of renewable energy such as solar energy and wind energy will make LED smart light poles more environmentally friendly and energy-saving, and promote the realization of carbon neutrality goals. The price of LED smart light poles varies according to different functional configurations and installation requirements. The price of basic LED smart light poles is usually between RMB 3,000 and RMB 5,000, while the price of smart light poles equipped with high-end functions such as 5G base stations, environmental monitoring, video surveillance, etc. can reach RMB 8,000 to RMB 15,000 or even higher. In addition to the purchase cost of the light pole itself, the cost of installation and later maintenance also needs to be considered, so the overall investment of smart light poles occupies a certain proportion

in urban infrastructure construction.

The global LED Smart Light Pole market size was estimated at USD 425.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.00% during the forecast period.
