In 2024, global LED Underwater Fountain Lights production reached approximately 4,704 K units, with an average global market price of around US\$ 45 per unit. LED Underwater Fountain Lights are specialized waterproof lighting fixtures designed to be submerged in fountains, ponds, or other water features, providing both functional illumination and decorative visual effects. Utilizing energy-efficient LED technology, these lights offer long service life, low power consumption, and vibrant color options, including single-color and RGB multicolor modes, often with programmable patterns or dynamic effects to enhance the visual appeal of water displays. Constructed from durable, corrosion-resistant materials such as stainless steel, anodized aluminum, or high-grade plastics, they are engineered to withstand continuous water exposure, high humidity, and varying water temperatures. Many models incorporate IP68-rated sealing to ensure complete protection against dust ingress and long-term submersion. In addition to aesthetic enhancement, LED underwater fountain lights can improve safety by increasing visibility in low-light conditions. They are widely used in public squares, hotel landscapes, amusement parks, residential gardens, and commercial properties.

The global LED Underwater Fountain Lights market size was estimated at USD 212.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.
