Abstracts

Lepidolite, a lithium-rich mica mineral, is primarily valued as a source of lithium for batteries, ceramics, and glass manufacturing, while also being used in gemology and metaphysical markets for its distinctive purple coloration and purported calming properties; triphane, a variety of spodumene, serves as a key source of lithium for the same industrial applications, particularly in the production of lithium-ion batteries, and is additionally sought after in its gem-quality form (known as kunzite when pink and hiddenite when green) for jewelry and collector markets. Both minerals are intrinsically linked to the global lithium supply chain, with demand heavily influenced by the expansion of electric vehicles, renewable energy storage, and consumer electronics, though their market dynamics also reflect niche demand from the gem, decorative, and wellness sectors.

The global Lepidolite And Triphane market size was estimated at USD 88.5 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.20% during the forecast period.
