Stevioside and its derivatives are natural non sugar sweeteners. Stevioside is a natural sweetener extracted from the stevia plant, which has a much higher sweetness than sucrose and has the advantages of low calorie content and less likely to cause blood sugar fluctuations. Derivatives of steviol glycosides, such as rebaudin M and rebaudin D, are obtained through further processing and optimization of steviol glycosides, with the aim of improving the purity and quality of sweetness, reducing post bitter and off flavors. Reb M, a natural sweetener extracted from *Stevia rebaudiana*, is characterized by high sweetness, low calories, and a taste similar to sucrose. It is currently a highly sought after sucrose substitute in the market.
