## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Leukotriene Receptor Antagonists competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Leukotriene receptor antagonists (LTRAs) are drugs targeting the leukotriene signaling pathway, competitively inhibiting the CysLT1 receptor to block the effects of inflammatory mediators, thereby reducing airway inflammation, improving airflow limitation, and controlling asthma symptoms. Representative drugs include Montelukast and Zafirlukast, primarily used for long-term management of asthma, treatment of allergic rhinitis, and adjunct therapy for certain chronic respiratory diseases. Upstream raw materials consist of pharmaceutical-grade fine chemicals, such as quinoline derivatives, pyridine derivatives, amide intermediates, and other organic synthesis reagents. Suppliers are mainly concentrated in India, China, and Europe/USA, with leading companies including Merck & Co. (USA), Cipla (India), Hetero Labs (India), and Huahai Pharmaceutical (China), all possessing mature API synthesis processes and stable supply capabilities. Downstream customers mainly include global pharmaceutical companies, generic drug manufacturers, and healthcare institutions, which formulate finished products and distribute them through hospitals, retail pharmacies, and e-commerce channels to end patients. The primary end-users are patients with asthma, allergic rhinitis, and other chronic respiratory diseases. With the rising prevalence of asthma and allergic diseases and the increasing need for long-term chronic disease management, the demand for LTRAs remains stable globally, driving optimization in API supply chains and improvements in formulation processes, thus supporting healthy growth across the entire industry chain. In 2024, the global average price of leukotriene receptor antagonists (LTRAs) is approximately USD 0.24 per tablet, with total sales reaching about 5.943 billion tablets.

The global Leukotriene Receptor Antagonists market size was estimated at USD 1426.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
