Report Overview

Full Flight Simulator (FFS) is a term used by the National Aviation Authority (NAA) for highly skilled flight simulators. There are currently four levels of full flight simulators, ranging from A to D, with D being the highest standard. D-level or Type 7 simulators simulate all aircraft systems that can be accessed from the cockpit and are crucial for training. For example, a simulator system called 'Control loading system' is used to provide precise force feedback for pilots' flight control, and other systems such as avionics, communication, and 'glass cockpit' displays are also simulated.
