## Abstracts

The most important part of power tools is none other than battery cells. Nickel-Cadmium cells were used in the past, but after the development of Lithium-Ion cells in the 2000s, Lithium-Ion batteries have been recently used in the most cases. Lithium-Ion cells has two times more energy density than Nickel-Cadmium cells so it can make them smaller, and they have longer lifetime which gives them stable performance despite frequent charging and discharging. Installed with Lithium-Ion battery, wireless power tools become more available and are actually being used more and more.
