Abstracts

Light and very light jets are a category of small, efficient business aircraft designed for short to medium-haul flights, typically seating 4 to 8 passengers and characterized by their lower operating costs, compact size, and advanced avionics compared to larger business jets. These aircraft are often favored by owner-operators, fractional ownership programs, and air taxi services for their ability to access smaller airports with shorter runways, providing flexibility and time savings for business travelers. The market for these jets is driven by demand for cost-effective, point-to-point travel solutions, technological advancements in fuel efficiency and cabin comfort, and the growing prevalence of on-demand charter services. Key players in this segment include manufacturers such as Embraer, Cessna, HondaJet, and Cirrus Aircraft, with models like the Phenom 100, Citation M2, HondaJet Elite, and Vision Jet defining the competitive landscape.
