Chemically, lignin is a cross-linked phenolic polymer with potential antioxidant effects. The high oxidation resistance of lignin opens a new direction for the application of lignin in cosmetic formulations. The utilization of lignin in the cosmetics industry is gaining attention due to its potential applications in skincare, haircare, and personal care products. Lignin, a natural polymer derived from wood and plant materials, is recognized for its sustainability and characteristic properties, making it an attractive ingredient in the formulation of cosmetic and personal care products.
