Report Overview

Line Rail Clamps, also known as Boulevard Clamps, are used to attach horizontal brace railing to a chain link fence. Typically used with mid and bottom rails, these fittings eliminate the need to use brace bands and rail ends on line posts. Line rail clamps keep your brace railing at a uniform height throughout the fence-line, giving it a clean look. They are also handy in other applications that use a pipe framework, like greenhouses, backstops, tennis courts, kennels, and other structures.
