Report Overview

Linear Variable Differential Transformers (LVDT) are non-contact, absolute position sensors. They include a transformer housed into a metal case and a ferromagnetic core which can be attached to an extension rod. The core slides inside the spool tube (also called boreliner) of the transformer. The transformer contains the coil assembly with primary and secondary windings and, in the case of DC LVDTs, the signal conditioning electronics as well.

Global Linear Variable Displacement Transducers (LVDT) key players include TE Connectivity, Honeywell, Sensata Technologies (Kavlico), etc. Global top three manufacturers hold a share about 35%.

Europe is the largest market, with a share about 35%, followed by North America and China, both have a share about 45 percent.

In terms of product, DC Type is the largest segment, with a share about 60%. And in terms of application, the largest application is Military/Aerospace, followed by Power Generation.
