The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. Linerless Receipts and Labels Printer is a specialized thermal printing device designed to produce receipts, tickets, or labels without the use of a traditional release liner backing. Unlike conventional label printers that rely on a silicone-coated liner to separate adhesive surfaces, linerless printers utilize specially coated media that prevents adhesive from sticking during the printing and cutting process. This technology not only simplifies printing operations but also significantly reduces waste by eliminating the discarded liner material, thereby supporting sustainable and eco-friendly business practices. Linerless receipts and labels printers are compact, efficient, and compatible with a wide range of adhesive and non-adhesive paper rolls, making them highly versatile. These devices are widely used in industries such as retail, food service, logistics, healthcare, and transportation, where efficiency, cost reduction, and environmental responsibility are key.

The global Linerless Receipts and Labels Printer market size was estimated at USD 1150.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 1.30% during the forecast period.
