Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Lingonberry Powder competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Lingonberry Powder is produced by freeze-drying wild Nordic lingonberries (*Vaccinium vitis-idaea*), preserving their high flavonoid (e.g., quercetin), natural benzoic acid preservatives, and vitamin K1 content. Related to cranberries but less acidic with unique A-type proanthocyanidins, it particularly benefits urinary tract health. The vibrant red powder offers a tart-sweet flavor for adding to cereals, functional confectionery, or sports nutrition, while its natural benzoic acid extends shelf life. Traditionally used in Nordic medicine for infections and gut health, modern applications include UTI prevention, cardiovascular support, and as a low-sugar berry alternative.

The global Lingonberry Powder market size was estimated at USD 832.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.
