Report Overview

Liquid Barium Zinc Stabilizer is a type of stabilizer used in the manufacturing of PVC (polyvinyl chloride). PVC is a widely used plastic material in various industries due to its versatility and durability. However, PVC is inherently unstable and can degrade over time when exposed to heat and UV radiation, leading to discoloration, brittleness, and other undesirable properties. Stabilizers are additives incorporated into PVC formulations to prevent or minimize this degradation process. Liquid Barium Zinc Stabilizer is one such stabilizer. It typically contains a mixture of barium and zinc compounds, along with other additives, in a liquid form. These compounds act as heat stabilizers, UV stabilizers, and antioxidants, protecting the PVC from degradation during processing and throughout its service life.

The global Liquid Barium Zinc Stabilizer market size was estimated at USD 670 million in 2023 and is projected to reach USD 822.16 million by 2032, exhibiting a CAGR of 2.30% during the forecast period.
