Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Liquid Silicone Rubber Seals competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of liquid silicone rubber seals reached 128,000 tons, with an average selling price of \$16,800 per ton. Liquid silicone rubber seals are highly elastic sealing elements made from two-component liquid silicone rubber through a mixing, injection molding, and curing process. They exhibit excellent high and low temperature resistance, chemical corrosion resistance, and insulation properties, and are widely used in the automotive, medical, electronics, and home appliance sealing industries. The main upstream raw materials are liquid silicone rubber, platinum catalysts, and reinforcing fillers (such as silica). Core suppliers include Dow, Wacker, Shin-Etsu Chemical, and Momentive. Major downstream customers include OEMs and component suppliers such as Bosch, Continental, Medtronic, and Samsung Electronics. The global liquid silicone rubber seal industry has a total annual production capacity of approximately 150,000 tons, with an average gross profit margin of 22%-28%. In the downstream consumption structure, automotive accounts for approximately 42%, medical 28%, and electronics 20%, with the remainder coming from industrial sealing and household appliance applications. Upstream liquid silicone rubber and silica raw material consumption account for 63% and 18% of production costs, respectively. In the future, with the expansion of new energy vehicles, wearable medical devices, and smart electronics, products will be upgraded towards high-purity, low-volatility, and automated injection molding.

The global Liquid Silicone Rubber Seals market size was estimated at USD 2150.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

6.40% during the forecast period.
