## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Lithium Soap Thickened Grease competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Lithium soap thickened grease is a multi-purpose grease that uses lithium soap (such as lithium stearate) as a thickener, combined with mineral oil or synthetic oil, and has excellent mechanical stability, water resistance and wide temperature adaptability (usually from -20°C to +120°C, with a dropping point of about 190°C). Since its invention in the 1940s, this grease has become the preferred lubricating material for metal contact parts such as bearings, chains, hinges, and wheels.
