Abstracts

Live video production services are comprehensive services built upon professional-grade film and television production workflows and real-time audio and video processing technologies, covering core aspects such as multi-camera shooting, directing and switching, audio mixing, graphics overlay, real-time special effects compositing, and 4K/8K ultra-high-definition encoding. This service utilizes SDI/HDMI digital interfaces, H.265/AV1 high-efficiency encoding, and RTMP/HLS/SRT streaming protocols to achieve low-latency (?150ms) transmission. It integrates a broadcast console, audio mixer, graphics generator, and virtual background system, supporting real-time subtitles, multi-screen monitoring, dynamic tracking, and AI intelligent editing. It is widely used in live event broadcasts (such as concerts, sporting events, and corporate launches), remote collaboration, virtual production, and immersive content production scenarios, forming a complete closed-loop solution for "acquisition-processing-transmission-distribution."The upstream of on-site video production services includes professional equipment and software supply (including cameras, switchers, lighting and sound systems, live streaming equipment, and post-production software), represented by companies such as Sony, Blackmagic Design, Canon, Adobe, and VMIX; the midstream includes core production execution and content production (covering on-site directors, cameramen, broadcast directors, technical support teams, and post-production editing and packaging), with participants including professional production companies, television production teams, independent studios, and freelancers; and the downstream includes various application scenarios and terminal channels (including corporate press conferences, brand promotion activities, sports events, cultural performances, online live streaming platforms, and conferences and exhibitions).

The global Live Video Production market size was estimated at USD 564.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.40%
