Abstracts

Livestock disinfectants are chemical or biological agents specifically formulated to eliminate or reduce pathogenic microorganisms on surfaces, equipment, and environments within animal husbandry operations, playing a critical role in biosecurity protocols to prevent disease transmission, control infection outbreaks, and maintain overall herd health. These products are designed for use in various settings including barns, milking parlors, transportation vehicles, and foot baths, and must balance efficacy against target pathogens with safety for animals, handlers, and equipment, often requiring approval from agricultural or environmental regulatory bodies.
