## Abstracts

Custody transfer in the LNG world means the transfer of ownership of LNG from one party to another. This happens when LNG is transferred from a supplier (e.g. a liquefaction plant) to a buyer (e.g. a receiving terminal or a shipper). The custody transfer system is important because it ensures the quantity and quality of LNG being transferred is measured, documented and agreed by both parties. This affects financial transactions, legal agreements and operational efficiency in the LNG supply chain.

The global LNG Custody Transfer System market size was estimated at USD 175.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the forecast period.
