Abstracts

A long-arm truck-mounted concrete pump is a specialized type of equipment utilized in construction projects where concrete needs to be transported over longer distances efficiently. These machines consist of a boom mounted on a truck chassis which extends out horizontally to deliver the liquid mixture directly where needed. With the help of powerful pumps installed within the vehicle body, operators control the delivery process using remote controls and can adjust the flow rate and angle of the spray nozzle accordingly to suit specific job requirements. This machine ensures accurate and precise placement of freshly made concrete, reducing labor intensity and material waste. Due to its compact design and versatility in handling different mixes, long-arm truck-mounted concrete pumps are ideal for construction sites with limited accessibility or restricted working areas.

The global Long Arm Truck Mounted Concrete Pump market size was estimated at USD 3127.12 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.90% during the forecast period.
