Long neck grinder is a precision electric grinding tool designed for processing deep holes, narrow gaps or inner corners of complex structural parts. Its biggest feature is the extended neck design, which enables the grinding head to reach places that conventional tools cannot reach for fine processing. This equipment is suitable for industries with high requirements for local grinding accuracy, such as metal processing, mold repair, automobile manufacturing, aerospace and shipbuilding. Long neck grinders usually support multiple grinding head replacements, have high speed, low vibration, excellent controllability and durability, can maintain operational safety while greatly improving grinding efficiency, and are important tools for surface treatment of complex parts.
