Report Overview

Low Acid Aseptic Filler is a kind of aseptic filling equipment for filling low acid food. The equipment adopts aseptic isolation technology, which can fill low-acid food in a sterile environment to maintain the freshness and quality of the food, while extending its shelf life. It is mainly composed of feeding system, aseptic filling system, sealing system, heating system and other parts. The aseptic filling system is the core part of the equipment, including filling nozzles, channels, filling chambers, etc., which can ensure that food is not contaminated by bacteria during the filling process. The heating system preheats food, killing potential bacteria and viruses without compromising food quality. The sealing system can seal the container to prevent air and bacteria from entering the container. Low Acid Aseptic Filler is widely used in the production and packaging of liquid food, such as milk, yogurt, juice, condiments, drinking water, etc. It is especially suitable for low-acid food that needs to be stored and transported at room temperature. It has the characteristics of high efficiency, stability, reliability, hygiene and safety, etc., and can meet the production requirements of food production enterprises.
