Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Low Entry Bus competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Low Entry Bus is a specially designed urban public transportation vehicle. Its main feature is that the floor height of the front door or middle door area of the vehicle is low (usually $\leq 350\text{mm}$), which is close to the height of the bus platform, reducing the number of steps for boarding and alighting, making it convenient for passengers to board and alight, and barrier-free, especially suitable for the elderly and people with limited mobility.
