Abstracts

Low profile CPU coolers are specialized cooling solutions designed for compact computer systems where vertical clearance is limited, such as small form factor (SFF) PCs, home theater PCs (HTPCs), and slim desktop cases. Characterized by their reduced height—typically under 75mm—these coolers prioritize space efficiency while maintaining adequate thermal performance for CPUs with moderate to low thermal design power (TDP). They often incorporate advanced heat pipe technology, dense fin stacks, and low-noise fans to maximize cooling capacity within strict dimensional constraints, balancing the need for effective heat dissipation against the physical limitations of confined builds.

The global Low Profile Cpu Coolers market size was estimated at USD 458.25 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.85% during the forecast period.
