Abstracts

Low-sugar tonic water is a variation of traditional tonic water that contains significantly reduced sugar content. It is typically sweetened with a smaller amount of sugar or alternative sweeteners, such as stevia, erythritol, or other low-calorie substitutes, to provide a milder sweetness without the high sugar content found in regular tonic water. While retaining the classic bitter taste from quinine, low-sugar tonic water is a popular choice for those looking to cut back on sugar intake, offering a healthier option for cocktails like gin and tonic, or as a refreshing, lower-calorie standalone beverage.
