## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Low Voltage Lithium Battery competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. A Low Voltage Lithium Battery is a type of lithium-ion or lithium-iron-phosphate (LiFePO?) battery designed to operate at relatively low nominal voltages, typically 12V, 24V, or 48V, compared with high-voltage EV traction batteries that often range from 200V to 800V. These batteries are widely used in applications where lightweight, compact, and safe energy storage is required rather than high power output for propulsion. In 2024, global sales of Low Voltage Lithium Battery reached approximately 1,904 k units, with an average global market price of around \$269 per unit. The production capacity for Low Voltage Lithium Battery in 2024 was approximately 1,963 k units. The typical gross profit margin for Low Voltage Lithium Battery is between 25% and 35%. The low-voltage lithium battery industry chain consists of upstream suppliers of key lithium battery materials (such as cathodes, anodes, electrolytes, and separators) and cell manufacturers; the midstream segment focuses on battery module assembly and BMS (Battery Management System) integration; while the downstream segment includes automotive OEMs and automotive electronics suppliers, where the batteries are used in start-stop systems, electric power steering, infotainment, lighting, and ADAS functions. With the rapid rise of electric and intelligent vehicles, low-voltage lithium batteries are increasingly replacing traditional lead-acid batteries, driving the industry toward higher energy density, improved safety, and lighter weight solutions.

The global Low Voltage Lithium Battery market size was estimated at USD 512.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.
