Abstracts

Lutein eye protecting tablets are dietary supplements formulated with lutein, a carotenoid antioxidant naturally found in plants, particularly in dark leafy greens like spinach and kale, as well as in marigold flowers. These tablets are designed to support ocular health by filtering high-energy blue light, reducing oxidative stress in retinal tissues, and potentially lowering the risk of age-related macular degeneration (AMD) and cataracts. They are often combined with other eye-supporting nutrients such as zeaxanthin, vitamins C and E, zinc, and omega-3 fatty acids to enhance efficacy. Marketed primarily to adults, especially older individuals and those with prolonged screen exposure, these supplements are positioned as preventive or supportive measures for maintaining vision clarity and protecting against environmental and digital eye strain.

The global Lutein Eye Protecting Tablet market size was estimated at USD 520.75 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
