Abstracts

The Lyophilized Microspheres Service utilizes freeze-drying technology to dry reagents or biomaterials in microsphere form and provides related products and technical support. This service typically involves converting liquid reagents into microspheres through a specific process, pre-freezing them into a solid state with liquid nitrogen, and then dehydrating them in a vacuum-cooled environment to form freeze-dried microspheres with a loose network structure. These freeze-dried microspheres maximize the activity of bioactive substances such as enzymes and proteins and facilitate room-temperature transportation and long-term storage at room temperature. The freeze-dried microsphere service may also involve developing customized formulations and selecting appropriate packaging containers based on customer needs to meet the needs of diverse application scenarios, such as PCR, ELISA, and flow cytometry. Liquid nitrogen lyophilized microsphere technology is currently transitioning from R&D and validation to pilot-scale production in the in vitro diagnostic industry. Compared to traditional in-situ freeze-drying processes, liquid nitrogen freeze-dried microspheres offer advantages such as a shorter process flow, lower energy consumption, and more flexible production lines. They are particularly well-suited for high-throughput, multi-batch, small-volume freeze-drying needs and are gradually gaining recognition from equipment and reagent manufacturers. With the growing demand for personalized medicine, remote diagnosis, and portable testing, liquid nitrogen freeze-dried microspheres, due to their ready-to-use nature, room-temperature stability, and high degree of integration, will be more widely embedded in various diagnostic devices, such as microfluidic chips, integrated reagent cards, and rapid screening platforms.

The global Lyophilized Microspheres Service market size was estimated at USD 129.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

8.30% during the forecast period.
