Report Overview

Magnesium L-Threonate is a unique form of magnesium that is specifically designed to enhance brain function and cognitive health. It is a compound of magnesium and L-threonate, a vitamin C metabolite, which has been shown to effectively cross the blood-brain barrier. This allows magnesium to reach the brain at higher levels compared to other forms of magnesium supplements. Magnesium L-Threonate is known for its potential benefits in improving memory, learning, and overall cognitive function. Due to these properties, it is often marketed as a nootropic or cognitive enhancer.
