Abstracts

A magnetic core broach drill is a portable drilling machine with a magnetic base (either electromagnetic or permanent magnet). It can use twist drill bits, annular cutters, milling cutters, and other rotary cutters. With suitable bits it can also tap threads, ream, and countersink. Its combination of a stable magnetic base and low RPM help resist or reduce torque forces created by large diameter bits. Magnetic core base drill presses with reversible motor and variable speed controls can also perform operations like tapping, countersink and reaming. Magnetic core drill press with cross table base and can also perform light milling.Portable magnetic drills enable users to secure the drill bit to the workpiece rather than trying to carry it there. The demand for magnetic drilling machines is likely to be greater in the coming years, which will drive the market demand for more advanced magnetic drilling machines. The drill press industry is expected to grow rapidly globally. The growing demand for automated drilling machines and the rapid expansion of industrial production industries are driving the growth of the global magnetic drilling machines market. In addition, as the industrial sector continues to expand, more and more workshops are using drilling machines. This factor is driving the growth of the global drilling machines market.

The global Magnetic Core Broach Drill market size was estimated at USD 266.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.10% during the forecast period.
