Abstracts

Maleic anhydride grafted polybutadiene (MLPB) is a polymer material with excellent performance and broad application prospects. By chemically modifying maleic anhydride to graft onto the polybutadiene molecular chain, polybutadiene can be endowed with new properties and application areas. MLPB has important application value in rubber modification, plastic modification, paint and coating, and composite materials. Major global MLPB manufacturers include Cray Valley, Evonik Industries, Synthomer, etc. These companies have strong competitiveness in product quality, technological innovation and market application. For example, the POLYVEST? product series provided by Evonik Industries includes maleic anhydride grafted liquid polybutadiene (POLYVEST? MA). This type of product has a wide range of applications in many fields due to its excellent chemical resistance, high water resistance, electrical insulation and other characteristics. The growth factors of the maleic anhydride grafted polymer market mainly include its widespread use in a variety of industrial applications, and with the increasing demand for sustainable and environmentally friendly materials, the degradability and biocompatibility of MLPB also drive the growth of market demand. Overall, the market prospects for maleic anhydride grafted polybutadiene (MLPB) are broad. With the advancement of technology and the expansion of application fields, it is expected that market demand will continue to grow in the next few years.

The global Maleic Anhydride Grafted Polybutadiene(MLPB) market size was estimated at USD 149.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.20% during the forecast period.
