Report Overview:

A Magnetic Drill Press is a specialized portable power tool used for drilling holes in steel and similar metals.

They are used on the job site or in the shop

Also referred to as a mag drill, portable base drills, portable drill press

It can be time-consuming and cumbersome to try to maneuver large steel or pipe into position at a stationary drill press or work center. A portable magnetic drill allows you to take the drill to the work piece, instead of trying to bring the work piece to the drill.

A portable magnetic drill may be used in any position—vertical, horizontal, or overhead (upside down)
