## Abstracts

Managed Software Testing Service is an end-to-end solution that fully outsources the software quality assurance process to a professional third-party service provider. Its core approach is to have an external team manage the entire lifecycle of testing, from test planning, environment setup, use case design, to automated execution, defect tracking, and quality reporting. This covers a wide range of testing types, including functional, performance, security, and compatibility testing. Unlike traditional outsourcing, MTS adopts a results-driven approach. The service provider independently builds a dedicated team of testing experts, tool chains, and global testing resources, deeply integrating into the client's CI/CD processes and providing 24/7 cross-time zone collaboration.

The global Managed Software Testing Service market size was estimated at USD 1573.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.30% during the forecast period.
