Report Overview

Marine Collagen Peptide Supplements are dietary supplements derived from the collagen proteins found in the skin, scales, and bones of fish and other marine sources. These supplements are hydrolyzed, meaning they are broken down into smaller peptides for better absorption and bioavailability in the human body. Marine collagen is known for its high concentration of type I collagen, which is essential for maintaining healthy skin, hair, nails, and joints. These supplements are popular for their potential benefits in improving skin elasticity, reducing wrinkles, promoting joint health, and supporting overall connective tissue strength.
