Abstracts

Marine Diesel Oil (MDO) is a type of marine fuel that falls between heavy fuel oil (HFO) and marine gas oil (MGO) in terms of viscosity and quality, specifically engineered for use in medium-speed and some high-speed diesel engines aboard ships, characterized by its relatively lower sulfur content compared to traditional HFO, though not as refined as MGO, making it a practical and widely adopted option for vessels requiring a balance between operational efficiency, regulatory compliance, and cost-effectiveness, particularly in contexts where stricter emission controls are enforced but full transition to premium distillates is not yet mandated or economically feasible.
