Abstracts

This report studies the Marine Steering System market. A boat's steering system determines the boat's course when the steering wheel is turned and, like most other systems on a boat, needs regular inspection, maintenance and cleaning during the boating season. A boat's steering wheel is part of the helm that connects to a mechanical, electric, or hydraulic system to assist in turning the boat. Boats with outboard motors steer with a wheel which rotates the entire drive unit; inboards sometimes use a pod with an attached propeller; personal watercraft use jet drives with an impeller to force water into a nozzle that the operator can turn to the desired course. Some modern ships replace the wheel with a toggle that remotely controls an electric or hydraulic rudder drive, with an indicator that shows the rudder angle in real time to the helmsman. Global Marine Steering System key players include SeaStar Solutions, Uflex, Mercury Marine, ZF, etc. Global top four manufacturers hold a share about 65%. North America is the largest market, with a share over 50%, followed by Asia Pacific and Europe, both have a share about 40 percent. In terms of product, Hydraulic Steering is the largest segment, with a share about 50%. And in terms of application, the largest application is Outboard Steering, followed by Inboard Steering.

The global Marine Steering System market size was estimated at USD 480.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.00% during the forecast period.
