Abstracts

Marriage and dating software is an online software that helps both men and women get to know each other and assists both parties in dating.The growing demand for paid subscriptions is expected to spur market growth during the forecast period. The success rate of marriage is declining and the number of singles is increasing all around the world. The recent trend observed among people, particularly the younger age group, is prioritizing career over getting settled and married. Most people now prefer to live alone. This factor is playing a significant role in increasing the popularity of online dating. Several statistics have highlighted the growing trend of staying unmarried among individuals in different parts of the world.

The global Marriage and Dating Software market size was estimated at USD 9234.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Marriage and Dating Software market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
