The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Mattress Packaging Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Mattress packaging machine is a fully automatic or semi-automatic packaging equipment designed specifically for mattress products such as spring mattresses, memory foam mattresses, latex mattresses, etc. It compresses and wraps mattresses in PE stretch film, non-woven fabric, or cardboard boxes through functional modules such as mechanical clamping, film wrapping, vacuum pumping, and heat sealing cutting to achieve the goals of volume compression, dust and moisture prevention, and easy transportation and storage. The mattress packaging machine market has experienced steady growth, fueled by the rapid expansion of global home-furnishing e-commerce and the logistics industry's demand for efficient packaging solutions. Increasing consumer expectations for dustproof, moisture-resistant, and damage-free mattress transportation have driven manufacturers to enhance automated technologies, including intelligent compression, vacuum sealing, and customized wrapping. Environmental concerns are also prompting the development of eco-friendly systems compatible with biodegradable materials and energy-saving designs to reduce waste and power consumption. Chinese manufacturers are gaining international market share with cost-effective solutions and fast delivery, while European and American companies focus on high-end, smart, and integrated packaging lines for premium mattress brands. Looking ahead, the integration of smart warehousing and IoT technology will make data-tracking and remote-monitoring capabilities key trends in next-generation packaging equipment.

The global Mattress Packaging Machine market size was estimated at USD 347.0

million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.10% during the forecast period.
