Report Overview

A mattress is a large pad for supporting the reclining body, used as or on a bed. Mattresses may consist of a quilted or similarly fastened case, usually of heavy cloth, that contains hair, straw, cotton, foam rubber, etc.; a framework of metal springs; or they may be inflatable.

Mattresses are usually placed on top of a bed base which may be solid, as in the case of a platform bed, or elastic, e.g. with an upholstered wood and wire box spring or a slatted foundation. Flexible bed bases can prolong the life of the mattress. Popular in Europe, a divan incorporates both mattress and foundation in a single upholstered, footed unit. Divans have at least one innerspring layer as well as cushioning materials. They may be supplied with a secondary mattress and/or a removable 'topper.'

China occupied 33.96% of the production market in 2017. It is followed by North America and Europe, which respectively account for around 24.60% and 16.42% of the global total industry. Other countries have a smaller amount of production.

Geographically, China and North America were the largest consumption market in the world, which respectively took about 26.69% and 26.65% of the global consumption volume in 2017.
